

## CARDBOARD CORES

Our machinery lines of latest technology are capable to produce "cardboard cores" between 32mm and 1000mm inner diameter and up to 14mm thickness at desired length. Having a smooth external cardboard core surface is very important for plastic film printers and manufacturers. High technology grinding and polishing lines offer very sensitive "smooth surface cardboard cores" to plastic film industry.

## CONCRETE TUBES

### FEATURES AND ADVANTAGES

- Cheaper than steel and wooden tubes
- Easy to set / Practical montage
- Nailable & drillable
- Lightweight, easy to carry & handle
- Obtainment of gross concrete, no need grout
- No need for mould oil or mould release agent
- Cylindrical column
- Concrete does not dry and crack promptly
- Can be produced from 150mm to 1000mm diameter
