

Slip sheets being made of solidboards and by having high breaking strength, can be used instead of pallets. There's no need for wooden pallets while slip sheets are in use.

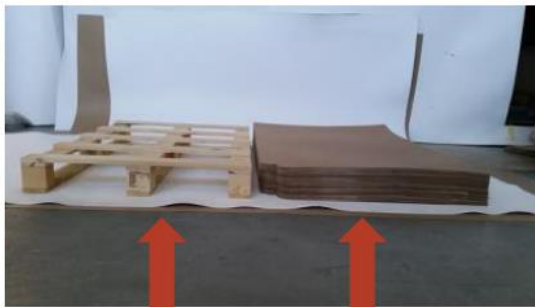

SLIP SHEET

SPECIFICATIONS AND DIMENSIONS

Thickness (mm)	0.5	0.6	0.8	1	1.2	1.5	2
Weight (gr/m ²)	500	550	650	800	1000	1250	1800
Max loading capacity (kgs)	less than 500kgs	500	700	1000	1200	1500	1750

Width (mm)	max. 1300
Length (mm)	as requested
Flaps (mm)	min. 60

1 wooden pallet = 100 slip sheets

ADVANTAGES

- 100% recyclable
- It has very low cost compared to wooden pallets that have the same function
- Light, practical and easy to use
- Hygienic. In its production there is no use of materials such as nail, stapler etc. that cause rust. Slip sheets do not own any risk of infection
- If requested client logo, slogan, photo etc. can be printed on slip sheets
- 100 slip sheets covers the same place as 1 wooden pallet so its stocking volume is 1% of wooden pallets
- 15% more available shipping space
- Weather resistant
- Workers safety
- Time saving at loading & unloading

CHARACTERISTICS AND VARIANTS

Options	Kraft	PE Coated	Anti Slip	Hydrophobe	Printable
Flaps	Up to 4 flaps according to the requested
